

### ML.69.Position Stamp Tool

I came across this position stamp going through some of Dad's things. I have many memories of him using it mission planning on our dining room table. Was this govt issued or something Dad would have had made up for himself? Not sure what that W/V entry would have been.

- Tom Dawes

I don't know who to give credit to, but it was definitely a 55th innovation by some veteran nav (maybe Sam Goeden or Sam Pizzo), and there were others.

The multiple celestial pre-comp form for one. The purpose was to keep all the nav info at turning points and fixes on the chart (map) in lieu of filling out the large paper log. Especially better use of space in the cramped nose of the RBs. I still have mine, as well, in a beat-up brief case.
