

ML.75.Corgi Scooters at Ramey

When crews deployed to Ramey AFB in Puerto Rico, they bought these collapsible Corgi scooters which were convenient to load in the RB-50s. It gave them freedom of travel around the base, and off where permitted. It seems everyone coming back from Ramey had one of these scooters.

Tom Dawes, Sr, on the left, with unidentified friend, ca 1952

We had insufficient room on the RB-47s to load them, however, 'ahem,' we did manage to find room for boxes of adult beverages in the ammo cans, chaff chutes and any bit of space we could find.

The photo is fuzzy so I'm unable to identify the second rider, but one thing is very clear, these guys were in great physical condition!
